

Professional Experience

Texas A&M University

August 2025 - Present

Graduate Assistant-Teaching | Part-Time

- Instructed students in media production, with a focus on 3D environment creation. Encompassing 3D asset modeling, surfacing, and scene layout, utilizing Unreal Engine and Autodesk Maya.

South Texas College

November 2023 - July 2025

Lab Coordinator | Full-Time

- Collaborated with faculty as well as other departments to plan and execute 2D graphics and 3D models with the use of Illustrator, AutoCAD, Maya for events and student career fairs.
- Assisted faculty with Animation & Rendering courses.
- Instructed students the use of fundamentals of 3D modeling with SketchUp and Maya for renders as well as 3D printing.
- Coordinated scheduling of lab equipment usage such as laser machines and 3D printers to optimize efficiency and minimize downtime for student use.
- Designed virtual reality environments for student career fairs with the use of Maya and Twinmotion

South Texas College

February 2023 - November 2023

Lab Assistant | Part-Time

- Utilized industry software to design graphics and promotional items ranging from 2D to 3D for the South Texas College, Architectural and Engineering Design Technology department, as well as operating laser machines and 3D printers.

Y20 Non-Profit Christian Organization

July 2017 - May 2020

Graphic Designer | Freelance

- Utilized industry software to design 2D/3D graphics that effectively communicated the organization's message and objective.
- In charge of social media, graphic design, videography, photography, promotional designs for the organization.
- Managed multiple projects simultaneously, meeting tight deadlines while maintaining high quality standards.

Presentations

Exploring Real Time Rendering and Virtual Reality, Building Communities Conference & Tradeshow, September 2022

- Explored emerging technologies with the use of Twinmotion, Unreal Engine 5 and programmed a client presentation tool, attended by over 100 industry experts.

Education

Master of Science, Visualization

May 2027

Texas A&M University, College Station

Specializing in developing immersive experiences within Augmented Reality and Virtual Reality environments, leveraging Unity and Unreal Engine.

Bachelor of Science, Visualization | Minor - Game Design & Development

May 2022

Texas A&M University, College Station

Participated in collaborative projects with interdisciplinary teams of artists, programmers, and designers to create interactive simulations and multimedia installations. Utilized industry-standard software such as Adobe Creative Suite, Substance Suite, Autodesk Maya, and Unreal Engine to produce high-quality and engaging animations that captivate audiences.
